TALIB NAWAZ

Full Stack Developer | Islamabad, Pakistan | 0343 9246597 | talibafridi97@gmail.com
LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full stack developer with 7 projects on GitHub, including a 16-screen Tailor Management System (Flutter, Node.js, MongoDB, FCM push notifications), Khoaaoo_jiii, a food delivery and restaurant management platform with real-time order tracking (Flutter, Supabase), and a full-stack JWT authentication app. Strong in Dart, OOP and C++, with experience in REST API development, MongoDB, PostgreSQL (Supabase), and state management using Provider. Seeking a full stack developer role in Islamabad.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Provider, setState, Material 3, local notifications, custom widgets, responsive layouts, navigation
Programming: Dart, C++, Object-Oriented Programming (OOP), Java, JavaScript, Python
Backend and Integration: Node.js, Express.js, MongoDB Atlas, Supabase (PostgreSQL, Auth, Realtime/WebSockets), JWT Authentication, REST APIs, JSON Parsing, Firebase Cloud Messaging (FCM), Firebase Admin SDK
Tools: Git/GitHub, Android Studio, VS Code

PROJECTS

Khoaaoo_jiii: Full-Stack Food Delivery & Restaurant Management Platform

Flutter, Dart, Supabase (PostgreSQL, Auth, Realtime), Material 3 | GitHub

- Built a full-stack food delivery platform: a customer Flutter app plus a real-time Admin Dashboard for restaurant managers, using Supabase (PostgreSQL, Auth) for menus, orders and user sessions.
- Implemented Supabase Realtime (WebSockets) for instant order alerts to managers and live order status updates for customers.
- Built cart customizations (portion sizes, add-ons, instructions), promo codes, a GPS location picker, scheduled pre-ordering and in-app live chat.

Tailor Management System (Final Year Project)

Flutter, Dart, Node.js, Express.js, MongoDB, Firebase (FCM) | GitHub

- Built a full-stack mobile app (Flutter, Node.js/Express REST API, MongoDB Atlas) for tailors to manage orders, customers, measurements, inventory and finances, with 16 screens including order tracking, due payments and profit/loss tracking.
- Implemented JWT authentication, Provider state management, multi-language support (English, Urdu, Arabic) and a theme toggle.
- Integrated Firebase Cloud Messaging with Firebase Admin SDK for backend push notifications. Defended the project at the university exhibition in May 2026.

Other Projects

- **Flutter + Node.js JWT Authentication:** full-stack login and registration with an Express REST API, MongoDB and JWT.
- **Quran Tajweed App:** Flutter app for reading the Quran with Tajweed rules and audio recitation.
- **Weather App:** WeatherAPI integration with real-time weather and a 3-day forecast.
- **Todo and Calculator Apps:** Flutter apps with persistent storage and instant UI state updates.

EDUCATION

Bachelor of Science in Computer Science (BS CS) | GPGC Kohat, Pakistan | Graduated 2026

LANGUAGES

English, Urdu, Pashto
